

Permanent Jewellery

TLC & Care Guide

Your Boujee Bae Permanent Jewellery is designed to be worn every day. With a little love and care, your piece will continue to shine beautifully for years to come.

Everyday Care

- Wear your jewellery with confidence - our demi-fine permanent jewellery is made for everyday wear.
- Clean your jewellery regularly using warm water, mild soap and a soft, lint-free cloth.
- Gently dry your piece after swimming, showering or exercising to help maintain its shine.
- If your jewellery begins to look dull, gently polish it with a jewellery polishing cloth.

Avoid Harsh Chemicals

To preserve your jewellery's finish, avoid DIRECT contact with:

Perfume

Hairspray

Sunscreen

Lotions and creams

Cleaning products

Chlorine

Bleach

Strong household chemicals

Treat your jewellery with love
it may be permanent, but it isn't indestructible.

Permanent Jewellery TLC & Care Guide

Be Mindful During Activities

Although your permanent jewellery is designed for daily wear, we recommend taking extra care when:

Lifting heavy objects

Playing contact sports

Going to the gym

Gardening

Moving furniture

Working with machinery

Avoid pulling, twisting or catching your jewellery on clothing, bags, towels or equipment, as excessive force may cause the chain to stretch or break.

Swimming & Water

Your Boujee Bae permanent jewellery is suitable for everyday life, including showering and swimming. However, frequent exposure to chlorinated pools, salt water and harsh chemicals may affect the longevity of the plating over time. We recommend rinsing your jewellery with clean water afterwards and drying it thoroughly.

About the Welded Link

The small link used to permanently weld your jewellery may naturally return to its original stainless steel silver colour due to the high heat used during the welding process. This is completely normal and does not affect the quality, strength or durability of your jewellery.

Need to Remove Your Jewellery?

Permanent jewellery is not permanently attached to your body. If you ever need to remove your piece for medical procedures, work, travel or personal preference, simply cut the jewellery at the small welded link. Please avoid cutting the chain itself, as this may damage your jewellery. If your piece gets caught or snagged avoid pulling as it is still chain and may cut.

You are welcome to visit any Boujee Bae store to have your piece re-welded

Treat your jewellery with love it may be permanent, but it isn't indestructible.
